

12-19-2005 NCAA-First GSR Numbers

Interview with Myles Brand, Walt Harrison, Kevin Lennon, Todd  
Petr, Eric Christianson

1                   ERIC: Thank you for joining us today to  
2 discuss the NCAA's new Graduation Success Rate.

3                   Joining me on the call today are the  
4 following individuals: Dr. Myles Brand, President of the  
5 NCAA; Dr. Walter Harrison, President of the University of  
6 Hartford. President Harrison is chair of the NCAA's  
7 Committee on Academic Performance; he's also chair of the  
8 NCAA Executive Committee. Also joining me are Kevin  
9 Lennon, NCAA Vice President for Membership Services; and  
10 Todd Petr, NCAA Managing Director for Research.

11                   In just a moment, I'll turn the call over  
12 to President Brand for open comments, followed by opening  
13 comments by President Harrison and also by Kevin Lennon,  
14 who will explain some of the methodology behind our new  
15 Graduation Success Rate.

16                   And after their opening comments, we will  
17 take questions from the news media on the line today.

18                   I now would like to turn the call over to  
19 Dr. Brand.

20                   DR. BRAND: Thank you, Eric. And thank you  
21 all for joining us today.

22                   I'm very pleased to announce the first  
23 graduate success rate data. This is a very important  
24 shift in the way we calculate graduation rates.

25                   The federally-mandated rate is a six-year

1 rate in which essentially the federal government,  
2 Department of Education, counts those who are beginning  
3 and looks at the same institution six years later and  
4 sees who graduates.

5 That's helpful, but inaccurate. It's  
6 inaccurate because it fails to take into account those  
7 student athletes who transfer into the program and those  
8 student athletes who exit the program.

9 If you take into account those student  
10 athletes who enter the program late, either from  
11 community college or from some other four-year  
12 institution and graduate, and take into account the  
13 student athletes who leave a particular athletic program  
14 and go somewhere else to graduate, and that's about 35  
15 percent of all the student athletes, then you get a very  
16 different set of numbers.

17 And, in fact, what happens is the  
18 graduation rate overall for student athletes increases  
19 from 62 percent up to 76 percent. That is a dramatic  
20 difference, and it's due to a much more accurate  
21 counting.

22 I urge the Federal Department of Education  
23 to adopt for all students this more accurate way of  
24 counting. Our students today are far more mobile than  
25 they have been in the past. In fact, 60 percent of the

1 students are taking coursework or transferring to other  
2 institutions as part of their education. And we must  
3 respect that migration of students in order to get  
4 accurate data.

5           That 76 percent rate includes both men and  
6 women. As in the case of the federal rate, women  
7 graduate at a higher proportion than men. Interestingly,  
8 in several of the key sports: Baseball, the federal rate  
9 is 47 percent, it goes up to 65 percent on this more  
10 accurate GSR (Graduate Success Rate) way of counting; in  
11 basketball, it goes from 44 percent to 58 percent --  
12 still low in comparison but significantly higher than the  
13 federal rate, 14 points higher; and in football, it goes  
14 from a federal rate of 54 percent for all Division I  
15 football to 64 percent.

16           Those are very significant differences. I  
17 think it speaks highly of the work that's being done in  
18 our athletic departments throughout the country to assure  
19 a genuine opportunity for young men and women to receive  
20 a college education at our fine institutions.

21           Let me turn it over now to Walt Harrison,  
22 President of the University of Hartford, to talk about  
23 the committee that is generating these rates and looking  
24 at it at this point.

25           I might add that these rates are based upon

1 1995 to '98 students entering. We have not yet  
2 calculated sanctions for these students who don't succeed  
3 at the level we expect or even what the cutoff line is as  
4 we did in the APR. This is a first-year dry run to make  
5 sure that everyone understands the methodology and how we  
6 proceed. But these early findings are really spectacular  
7 and demonstrate the quality of our athletic programs.

8 Walt.

9 DR. HARRISON: Thanks, Myles.

10 I thought I'd just concentrate on how this  
11 fits into what we're trying to do in academic reform.  
12 Our goal really is to provide greater transparency and  
13 greater accountability so that you, members of the media  
14 and the general public, can get a better idea of what we  
15 are doing right and what we're not doing right in  
16 intercollegiate athletics at the Division I level.

17 So we now released two rates. The first  
18 rate that we released last year, the APR rate, is a  
19 term-by-term, year-by-year rate; and so it gives you kind  
20 of realtime accountability for how student athletes are  
21 doing. This rate, as Myles explained, the Graduation  
22 Success Rate is a historical rate; so it tells you how  
23 students are moving toward graduation over a much larger  
24 period of time. So I think what we've done here is to  
25 provide accountability both on a realtime basis,

1 year-by-year, and over a historical basis.

2           And as a management tool, I think  
3 presidents and athletic directors would be well-advised  
4 to use both these rates together. The APR rate tells you  
5 what your teams are doing right now, and the Graduation  
6 Success Rate tells you how your teams have done over a  
7 great period of years.

8           When I look at the Graduation Success Rate  
9 for my own institution, for example, I see a lot of  
10 markedly improved graduation scores in many sports. I  
11 think that -- as a leader of an institution, however, I  
12 don't use that to pat myself on the back -- I try to  
13 understand why the scores are better in the graduation  
14 success rates than they are in the federal rates and then  
15 what that tells me about the programs, and so I think in  
16 that capacity, it certainly explains a lot.

17           And it also has some limitations. And  
18 students who entered between 1995 and 1998, which would  
19 be the ones tracked by this rate, in some of our sports,  
20 a lot of water has gone over the dam since then.

21           Take, for example, women's soccer, where  
22 our federal rate was 22 percent and our Graduation  
23 Success Rate was 80 percent. That tells me something  
24 about how the coach who was the head coach then operated,  
25 but we are actually two coaches further down the road

1 than we were in '95 to '98. So I can use this rate well,  
2 but I have to combine it with the APR, which gives me a  
3 more up up-to-date, year-by-year rate.

4 And with that, that's just sort of my  
5 opening comments. And I'll turn it over to Kevin Lennon  
6 to explain a little bit about how it works in detail.

7 MR. LENNON: Thank you, President Harrison.

8 Under the leadership of President Brand,  
9 President Harrison, and our Division I Board of  
10 Directors, we are beginning to see implementation at all  
11 levels of the academic reform package which has been  
12 paramount to the NCAA for some time.

13 I'd like to talk a little bit about the  
14 multifaceted approach that the Board has supported as it  
15 relates to academic reform and then specifically how this  
16 Graduation Success Rate will be used as it relates to  
17 academic reform.

18 Walt talked about the APR as being a  
19 measurement of eligibility graduation and retention done  
20 on a term-by-term basis for all scholarship athletes. As  
21 most of you are aware, we are in the process of  
22 collecting the second year of APR data, and that will be  
23 released publicly this coming February 2006. The  
24 Graduation Success Rate measures the ultimate outcome  
25 being graduation, as Dr. Brand talked about, for classes

1 beginning in 1995 through 1998.

2           One point on the methodology that we  
3 continue to stress here obviously is the transfer issue  
4 that Dr. Brand spoke about. Transfers that arrive on our  
5 campuses who have academic success will be counted  
6 favorably for the first time for those institutions; and  
7 conversely, transfer students who leave an institution  
8 but were in good standing will no longer be held against  
9 that particular sports team. That is the fundamental  
10 change with the Graduation Success Rate. And, as  
11 Dr. Brand talked about, a much improved metric from that  
12 perspective.

13           As you think about academic reform and the  
14 final component of increased accountability for teams and  
15 for institutions based on the academic success, it's our  
16 belief that these two new metrics, the APR working with  
17 the GSR, provide a much-improved measurement tool to  
18 examine how successful we have been and, in turn, to  
19 place accountability in terms of penalties and rewards on  
20 those sports teams.

21           It's true that the APR, that realtime rate,  
22 is where most of the penalties and rewards will be  
23 based -- on realtime, team-by-team performance. The GSR,  
24 however, in that it is a historical look at a team's  
25 previous academic success, is something that the

1 Committee on Academic Performance is continuing to  
2 discuss how it may best be used with academic reform and  
3 in particular with penalties and rewards.

4           The thinking at this point in time is that  
5 in the historical penalty phase, where you have  
6 institutions that have historically been underperforming  
7 based on their APR scores, when you hit penalties such as  
8 prohibition against postseason competition or restricted  
9 membership status, that the GSR will be something that an  
10 institution can point to -- again, having collected  
11 additional years of GSR data when these penalties will be  
12 implemented -- to explain and provide a historical  
13 perspective on the academic success that they have had  
14 with their student athletes.

15           It clearly measures a different group of  
16 students, but it is an indication of a historical  
17 performance of a particular sports team. And we imagine  
18 that that type of information will be made available as  
19 mitigation, if you will, for institutions subject to the  
20 most severe penalties in the incentives/disincentives  
21 program.

22           Having said that, we are now at the  
23 contemporaneous penalty phase this year. Institutions  
24 who would be subject to the loss of scholarships or  
25 student athletes who fail to meet academic commitments

1 and who are not retained, we are seeing in some instances  
2 that institutions are submitting these GSR scores as an  
3 indication of the past academic success they have had  
4 with their teams.

5 So institutions are noting this as a means  
6 of talking about their academic commitment, and it is  
7 something that is certainly being considered by the staff  
8 and by the committees as they look at contemporaneous  
9 penalties.

10 So much work will continue with the  
11 Committee on Academic Performance as it relates to all of  
12 the academic reform issues, but that is basically how the  
13 GSR and the APR will play their way out from a  
14 penalties-and-rewards perspective.

15 I think with that, Eric, we'll just turn it  
16 over to questions.

17 ERIC: Great. We'd like to now go to the  
18 operator for her to explain how reporters can ask  
19 questions today.

20 THE OPERATOR: At this time, if you'd like  
21 to ask a question, please press the star key followed by  
22 the digit 1 on your touch-tone phone. Once again, it is  
23 star 1 for questions today.

24 Our first question comes from Dennis Dodd  
25 with CBS SportsLine. Go ahead, sir.

1 DENNIS DODD: I guess this is for maybe  
2 Dr. Brand or Kevin.

3 Specifically, in 1A football, there's only  
4 a handful of head coaches that have been around, you  
5 know, since '95 to take full accountability for their  
6 graduation rates. What does that say, either good or  
7 bad, about, you know, the rates they produce? I just  
8 made a cursory look-through, and I think most of them are  
9 above the average, 65 percent.

10 DR. BRAND: I think that's a correct  
11 observation. There is turnover in coaches -- not just in  
12 football, but other sports as well. And what we're then  
13 talking about is the continuity in the program of  
14 emphasizing academic performance, and even as coaches  
15 change, there often is that kind of continuity. It gives  
16 us a context in which to look at the academic  
17 performance.

18 It's important to note that not every team  
19 has a higher GSR than a federal rate.

20 DENNIS DODD: Right.

21 DR. BRAND: In fact, only three-quarters of  
22 the teams, all told, have higher GSRs. And the reason  
23 for that is that some teams may have practices  
24 longstanding in which they attract, for example, transfer  
25 students, and those transfer students do not succeed

1 academically -- or say they flunk out.

2           If you have a lot of those students coming  
3 into the program, say, from community college, two-year  
4 schools, and then not succeeding academically, then your  
5 GSR will be lower than your federal rate. And we can  
6 pick up those patterns now over the long-term which are  
7 not possible on the APR or the federal rate.

8           DENNIS DODD: And consequently, what does  
9 it say about these programs that the overwhelming  
10 majority of which do have turnover and quite a bit in  
11 coaching? And just looking at this thing, it looks like  
12 half of 1A football falls below that average.

13           DR. BRAND: Well, usually, half fall below  
14 the average.

15           DENNIS DODD: Well, yeah. I'm not a math  
16 major, exactly.

17           DR. BRAND: Okay.

18           DENNIS DODD: Thank you.

19           ERIC: Thank you. Next question, please.

20           THE OPERATOR: Yes. We go next to Wendell  
21 Barnhouse of the Fort Worth Star-Telegram. Go ahead,  
22 sir.

23           ERIC: Wendell, go ahead.

24           WENDELL BARNHOUSE: Yeah, Kevin, I guess  
25 this is for you.

1                   This is just kind of, as Myles said, kind  
2 of a dry run. What should we take these numbers to look  
3 at when we get on the website? I mean, is it apples and  
4 oranges to compare them to the federal rates? Or should  
5 we just compare them to the average? In other words, if  
6 we look at a certain school and compare their team  
7 graduation rates, should we base it on the average? Or  
8 what's the fair way to look at these numbers right now?

9                   DR. BRAND: I think both ways. Because,  
10 first of all, the federal rate really is inaccurate and  
11 it's unfair. And a lot of the discussion in the past has  
12 been about the federal rate and wondering why we're not  
13 getting above 50 percent, for example.

14                   So I think as a matter of fairness and  
15 accuracy, we need to compare the federal rates with the  
16 GSR and then better understand what our student athletes  
17 are doing. So that is a major step forward in my book.

18                   Of course, it always looks interesting to  
19 compare one team to another, and I'm sure you'll do that  
20 as well. And we've released all the information on the  
21 federal and GSRs for all teams and all sports in Division  
22 I; so I expect you'll do that.

23                   But I think you have to keep in context the  
24 real accurate numbers you now have about graduation  
25 rates; and, frankly, they look good.

1                   WENDELL BARNHOUSE: Right. I guess my  
2 point was since there's nothing with the GSR rates to  
3 compare it previous, you know, years, and since this is  
4 the first time, is it -- you know -- and I understand  
5 that the federal rate has been kind of, you know, it's  
6 not fair -- but is it just -- since you got one set of  
7 GSR numbers right now, is it -- I mean, not to knee-jerk  
8 one way or the other to say, "Hey, this team is doing  
9 really good or really bad"?

10                  DR. BRAND: Well, I think, you know, high  
11 rates should always be praised. You don't -- Wendell,  
12 you're right. We don't have enough data here, and that's  
13 why we're running a trial run.

14                  We do have a complete data set, unlike we  
15 had with the APR. But we don't have year after year to  
16 look at trends. And we will have that in the next couple  
17 years; so that's why we're doing a trial run now.

18                  WENDELL BARNHOUSE: Right. And I would --  
19 Myles, also I was just curious if each year when either  
20 the Final Four or the NCAA Tournament, or recently when  
21 the Bowl match-ups were announced, a gentleman down in  
22 Orlando whose name is escaping me right now --

23                  DR. BRAND: Richard Lavender (phonetic).

24                  WENDELL BARNHOUSE: Yeah. The Associated  
25 Press always picks it up, and it's always based on the

1 graduation rates from the federal government, which are  
2 six years old. How unfair has that been to, you know,  
3 compare, you know, current stuff to not only the federal  
4 rate but something that was, you know, on classes from,  
5 you know, six years past? It seems to me that a lot of  
6 times that gets ignored and people say, "Oh, my gosh, the  
7 teams in the bowls are graduating 41 percent," or  
8 whatever it is.

9 DR. BRAND: Yeah, I think that's a fair  
10 comment. It is old information in the sense, as we know,  
11 the coaches may have changed; certainly, the students  
12 have changed. So it is somewhat out of date, and I think  
13 that's problematic. And that's why we've also created  
14 the APR, which is realtime, as you know.

15 The APR rates, I should say, don't have  
16 large enough databases, sport by sport, school by school,  
17 to be as accurate as the GSR is right now. And so we put  
18 in a margin of error for the APRs and took that into  
19 account and will take it into account as we're issuing  
20 sanctions.

21 So one needs to look at a margin of error  
22 on small data sets, say, any team but football, frankly,  
23 that we don't have with respect to the other teams.

24 So let's be careful how we use those APR  
25 and understand and interpret them correctly with the

1 margin of errors in them. It's too easy just to look at  
2 the raw scores and draw conclusions on APRs.

3 WENDELL BARNHOUSE: Thank you very much.

4 ERIC: Next question, please.

5 THE OPERATOR: Yes. We go next to David  
6 Wharton with the Los Angeles Times. Go ahead.

7 DAVID WHARTON: Good morning. I just  
8 wanted to be clear on something. While the NCAA  
9 continues to grapple with how to use the GSR in terms of  
10 potential historical penalties, it can be used now or it  
11 can be submitted by schools in consideration of the APR  
12 situation?

13 MR. LENNON: Yes. This is Kevin. That's  
14 right. We're now beginning to receive rate requests  
15 based on the contemporaneous penalties which again are  
16 tied back to two years of APR scores. And institutions  
17 have been submitting their GSR scores, again as a  
18 historical look at how well they have done in graduating  
19 their student athletes. And that is simply one of a  
20 number of factors that the staff and the committee would  
21 consider in determining whether the penalty is  
22 appropriate or not.

23 DR. BRAND: Walt, you might want to comment  
24 on the next steps the CAP Committee will take with  
25 respect to GSR cutoff points and penalties.

1 DR. HARRISON: Sure. I'd like to double  
2 back for just a minute to say that although earlier we  
3 were talking about whether the federal rates are fair. I  
4 think that the way I'd like to put it is that the GSR  
5 gives you a more accurate snapshot of how well your  
6 students are graduating than the federal rate does. It's  
7 accuracy that I'm interested in, and I think this is a  
8 much more accurate rate.

9 As Myles suggested, there are two sets of  
10 penalties we're looking at: The so-called  
11 contemporaneous, which are based on APRs. And so  
12 they're -- those are the warning shot penalties. And so,  
13 we are -- those penalties, which will be released in  
14 February, will be messages to teams that they're not  
15 moving in the right direction and that they need to pay  
16 attention to them.

17 The second phase of penalties, the  
18 historical penalties, where GSR will become important to  
19 us, are those penalties for the worst-performing teams.  
20 You might call it the worst of the worst. So there the  
21 penalties will be more severe, but the numbers of teams  
22 affected will be much smaller because we're really going  
23 to aim at those teams that are really significantly  
24 underperforming.

25 So I suspect that we will use the APR

1 accumulated over a number of years and the GSR to try to  
2 identify the worst-performing teams. And those are the  
3 teams that will be subject to the historical penalties,  
4 which will be the much more severe set of penalties.

5 ERIC: Next question, please.

6 THE OPERATOR: Yes. We go next to Pete  
7 Thamel with the New York Times. Go ahead, please.

8 PETE THAMEL: This question is for  
9 Dr. Brand.

10 Myles, this is obviously an issue -- the  
11 transfers especially -- that men's basketball coaches  
12 have particularly been kind of railing about for years.  
13 What's been their reaction to you guys changing this  
14 formula? And why did it take so long? I mean, this has  
15 been out there for probably about a decade.

16 DR. BRAND: We've listened happily to the  
17 basketball coaches. They were right. And we learned to  
18 take this into account.

19 It's a complicated issue, not just in the  
20 methodology but to collect the data over a period of  
21 years; so it has taken some time. And we really haven't  
22 started, Pete, academic reform in earnest for the last  
23 several years. So we've actually reacted pretty quickly  
24 once we got going.

25 The basketball coaches have been pleased

1 with this approach because when a student athlete  
2 transfers to another school or, for example, the small  
3 handful that might go to the pros, and they leave in good  
4 academic standing, then it does not count against the  
5 team.

6           The key issue here, of course, is leaving  
7 in good academic standing. We want the student athletes,  
8 while they're enrolled in school, to succeed  
9 academically, but we do understand that they may want to  
10 do something differently with their lives or move to  
11 another institution for lots of good reasons -- get a  
12 different major or more playing time -- whatever reason  
13 they have -- and continue their studies at that point.

14           So I think the coaches now understand that  
15 this methodology really respects that transferability,  
16 provided that the student athletes are in good academic  
17 standing.

18           PETE THAMEL: Thank you.

19           ERIC: Next question, please.

20           THE OPERATOR: We go next to Steve Wieberg  
21 with USA Today.

22           STEVE WIEBERG: Quick question for Kevin.

23           For purposes of comparison to past  
24 benchmarks, we have the overall GSR for Division I and  
25 the other divisions. Do we have that for the federal

1 rate as well? I notice it's not listed. Or is that  
2 something that's not going to be released until February?

3 MR. LENNON: Steve, this is Kevin. I'm  
4 going to turn it over to my colleague Todd Petr.

5 MR. PETR: Hi, Steve. All of that  
6 information on the federal rate will be released with the  
7 January release when the information on federal, as well  
8 as some more detailed information on GSR, are all  
9 released in sort of the format you've seen before.

10 STEVE WIEBERG: All right. And then quick  
11 a question for Myles, if I could.

12 The 60 percent that you've referred to of  
13 all students transferring at some point during their  
14 college careers -- I'm not just talking about athletes,  
15 but students overall -- that just struck me as high.  
16 Could I ask you the origin of that, Myles?

17 DR. BRAND: Yeah. We need to be careful  
18 here. It's a good question.

19 The 60 percent is all students who are  
20 taking coursework at some other institution -- many of  
21 whom transfer, some who do not, who transfer the  
22 coursework credits back to their home institution. The  
23 actual transfer numbers are probably closer to  
24 35 percent.

25 If you look at the press release, we've

1 captured about 35 percent of the students that were lost  
2 under the federal rate, and that's what makes it more  
3 accurate. But about 60 percent of the students are  
4 taking coursework outside of their home institution.

5 STEVE WIEBERG: I mean, that could include  
6 somebody who was, like, taking a couple of hours of  
7 community college credits over the summer.

8 DR. BRAND: That's correct. That's  
9 correct. So if you're looking for the transfer number,  
10 the actual number of students that transfer, we don't  
11 have an actual head count, but we note that there's a  
12 35 percent increase in the database size doing it this  
13 way rather than the federal rate. And that's a good  
14 surrogate to the numbers who transfer.

15 STEVE WIEBERG: Okay. Thanks.

16 ERIC: Next question, please.

17 THE OPERATOR: Yes. We go next to Liz  
18 Clarke with the Washington Post.

19 ERIC: Hi, Liz. Go ahead.

20 LIZ CLARKE: Thanks so much. I believe  
21 these are both for Kevin.

22 And am I correct in thinking that the  
23 federal rate is the rate, the only rate, that exists for  
24 all college students and also all non-scholarship student  
25 athletes? Is that right?

1 MR. LENNON: No. Your first part is  
2 correct.

3 LIZ CLARKE: Okay.

4 MR. LENNON: But the federal graduation  
5 rate there does talk about individuals who enter in a  
6 given year are on scholarship.

7 LIZ CLARKE: Okay. Can you repeat that?  
8 You mean the federal rate, the one that we're talking  
9 about, is not being quite as accurate. The whole reason  
10 that this was retooled, that federal rate, that does  
11 include scholarship athletes?

12 MR. LENNON: Yes, it does.

13 LIZ CLARKE: Oh, I'm sorry. Okay. So  
14 that's just like the broad, the biggest net. It includes  
15 everybody; is that right?

16 MR. LENNON: No. By way of example, let's  
17 take the year 1995, which would have been the first year  
18 that's being reported as a part of this four-year group  
19 from '95 to '98. They take a snapshot of every  
20 scholarship student athlete that enrolled as a freshman  
21 in 1995. Six years later, they ask: Out of those  
22 students how many graduated?

23 LIZ CLARKE: Right. I'm sorry. Let me  
24 interrupt because I totally understand that. I have not  
25 phrased this question well.

1                   If I want to talk about the universe of  
2 college students who either do not play any sports at all  
3 or are walk-ons, the only way I can speak about their  
4 graduation rate is in terms of the federal numbers. I'm  
5 trying to figure out if there's any corollary that exists  
6 to a GSR for the average college student who doesn't play  
7 sports.

8                   DR. BRAND: Liz, this is Myles. The answer  
9 is no. And that's one of the reasons we're urging the  
10 Department of Education to adopt this more accurate  
11 metric.

12                   LIZ CLARKE: Exactly. Exactly. But until  
13 and unless they do that, there is no way to compare the  
14 GSR for Division I athletes to -- there's no corollary,  
15 there's no number compiled in the same way for  
16 non-athletes?

17                   DR. BRAND: That's correct. But except  
18 that we have an intuition -- and for example, the Knight  
19 Commission had an intuition about what kind of graduation  
20 we expect, say, over 50 percent. And we've all been  
21 using that intuition about what we think is a normal  
22 performance of students. And I think by this more  
23 accurate way of counting, we can see how that intuition  
24 fits into what the actual numbers are for student  
25 athletes. And they seem good to me.

1                   LIZ CLARKE: But, I mean, there's no sort  
2 of meaningful comparison to draw anymore to non-student  
3 athletes, is there? I mean, beyond intuition?

4                   DR. BRAND: Beyond intuition. I'm in  
5 agreement that the federal rate is inaccurate for the  
6 regular student body, as well as it is for athletes.

7                   LIZ CLARKE: Okay. And this is a very  
8 miniscule question, a very narrow question: In the  
9 process of compiling all this data, did you break out any  
10 information about the percentage of men's basketball  
11 players who leave early for the NBA either successfully  
12 or unsuccessfully?

13                   I'm curious, what percentage of that subset  
14 leaves in good standing? Did you come across that? And  
15 I'm just curious, if you did, what percentage that is?

16                   MR. PETR: In the graduation -- this is  
17 Todd, by the way.

18                   LIZ CLARKE: Thanks, Todd.

19                   MR. PETR: In the Graduation Success Rate  
20 data, specifically these data, there is no -- we don't  
21 have them at the individual level. So if a person  
22 leaves, we don't know. I will say that we have data like  
23 this, not just for one year, but from our academic -- the  
24 APR data. And first of all, it's a very, very small  
25 number -- 1 percent, I believe, that leave for the pros,

1 or less than 1 percent.

2 DR. BRAND: I thought it was 8/10ths of a  
3 percent.

4 MR. PETR: That's right.

5 LIZ CLARKE: Okay. Okay. So that's the  
6 big group we're talking about. And I'm asking about what  
7 percentage people of that subset is in good academic  
8 standing.

9 MR. LENNON: I believe that over half of  
10 them that we saw in this last year were in good academic  
11 standing when they left.

12 LIZ CLARKE: Okay. Thank you all.  
13 Appreciate it.

14 ERIC: Next question, please.

15 THE OPERATOR: Yes. We go next to Jackie  
16 Sherrill (phonetic) with Division I Sports Radio  
17 New York. Go ahead, please.

18 ERIC: Jackie, go ahead.

19 JACKIE SHERRILL: Yes. The question I have,  
20 when students drop out of school, and you say these kids  
21 that are football or basketball players that go into the  
22 NFL or the National Basketball League in good standing,  
23 is that at the beginning of the semester? Or is that the  
24 day they drop out? Or is that at the end of the  
25 semester?

1                   MR. LENNON: Jackie, this is Kevin. That  
2 would actually be at the end of the term. To receive  
3 that point, if you will, that eligibility point -- and  
4 the numbers that Todd gave are exactly right -- it's over  
5 half in men's basketball, and it's a much higher  
6 percentage actually in football and other sports. We're  
7 taking the snapshot of that term. They had to have  
8 completed all of their academic commitments.

9                   So it's not taken at the beginning of the  
10 term. It's literally taken at the end. And those  
11 students would have been eligible had they come back to  
12 campus. That's our key criteria.

13                  DR. HARRISON: Yeah. Kevin, any kid that  
14 leaves early after the, i.e., Basketball Draft or the  
15 Final Four or leaves in spring for the football after  
16 draft, then those kids would be counted against the APR?  
17 They dropped out of school.

18                  MR. LENNON: And that's assuming they do  
19 not come back to campus the next year; they're not  
20 retained. They've simply left campus, did not finish  
21 their academic work, and did not come back to campus --  
22 that is correct, Jackie. Those would be what we call, in  
23 our vernacular, "0-for-2s."

24                  ERIC: Thank you. Next question, please.

25                  THE OPERATOR: Yes. We go next to Ted

1 Hutton with the South Florida Sun Sentinel. Go ahead,  
2 please.

3 TED HUTTON: Yeah. This might be more for  
4 Walter.

5 But with this increase, you jumped from the  
6 federal rate overall in talking of 62 to 76, a 14 percent  
7 increase. Now, the APR has been set at a projected 50  
8 percent graduation rate, the cutoff for the APR. With  
9 this increase now to 76 percent under this new thing,  
10 would there be any chance to moving that APR cutoff point  
11 higher?

12 DR. HARRISON: It's a great question.  
13 That's one of the things we have talked about looking at  
14 once we have all this data. We're not going to do it  
15 immediately, but one of the things we want to take a look  
16 at is whether that's the right point given the new GSR  
17 data.

18 TED HUTTON: And then as part of that also,  
19 if we're -- if the federal, you know, do take this and  
20 kind of have a similar rate, then you should -- you'll  
21 create an apples-to-apples comparison with the overall  
22 student population, which now, at this point, won't be  
23 able to be done. And it'll be done on an  
24 institution-by-institution basis.

25 Is that -- is there some point you're

1 talking about that maybe at that point you're not having,  
2 you know, tying the APR and GSR to the individual  
3 institution rather than having a generic cutoff point  
4 that, you know, that all the colleges and universities  
5 meet?

6 DR. HARRISON: Well, we've certainly talked  
7 about that. There are a whole range of institutions in  
8 Division 1 that -- and I'm not talking about their  
9 athletic teams, but about their academic profile. At the  
10 moment, the way we're planning to handle that is through  
11 appeals and waivers. But as we get more sophisticated  
12 with this data, I think your question is, Would you build  
13 it into the way it measures the rates? We might. At the  
14 moment, we're really at that beginning phases of  
15 understanding what all these rates mean.

16 TED HUTTON: Okay.

17 ERIC: Next question, please.

18 THE OPERATOR: We go next to Doug Lederman  
19 with Inside Higher Education.

20 DOUG LEDERMAN: Hi. Thanks for taking the  
21 time. One quick sort of housekeeping question: What was  
22 the -- and then I have a follow-up. What is the reason  
23 why there are no institutional rates being released  
24 today? And that's probably for either maybe Todd or  
25 Kevin.

1 month here, we can focus on what those numbers mean. And  
2 then at a later point in time, we'll provide a broader  
3 analysis there as it relates to an institution's GSR.

4 DR. HARRISON: Okay. So now it's over to  
5 me? I think that it's -- let me try to take two of --  
6 the two possibilities that you'd look at as a President,  
7 at least -- that is to say where your GSR rate is  
8 significantly higher than your federal rate and then the  
9 opposite.

10 If your GSR rate in a sport were  
11 significantly higher, then the federal rate, I think  
12 you'd look primarily at transfer students, and you'd  
13 probably -- you could conclude that the transfer students  
14 who left were leaving when they were academically  
15 eligible and that those that were coming in were  
16 graduating. So it would indicate that -- the difference  
17 between the two rates would indicate that you were having  
18 a better look at how transfer students did.

19 And I think conversely, if your GSR rate is  
20 lower than your federal rate, and we want a conclusion  
21 that reached -- I mean, we're just talking about  
22 generalizing. I'd have to look at specific teams. But I  
23 think one of the obvious conclusions would be that  
24 students are transferring in and not graduating. And at  
25 the federal rate, they're not counted at all. I've

1 always said it's as if they never existed. Now, they  
2 exist, and you are held accountable for how well they're  
3 moving through to graduation.

4 So at least without knowing what team we're  
5 talking about, one of the first things I'd look at would  
6 be to see how well are the students who have transferred  
7 in are doing and progressing toward graduation.

8 DOUG LEDERMAN: Thanks. If I could have  
9 just a quick follow-up, Dr. Harrison.

10 You made sort of a distinction between  
11 whether the federal rate was unfair or just inaccurate.  
12 And I guess one of the -- there's been several repeated  
13 mentions of the reasons why athletes transfer in or out.

14 I guess what I'm driving at is aren't the  
15 reasons that athletes tend to transfer in or out, or all  
16 the movement for them, very different from the reasons  
17 that, on the -- in general, the reasons why students in  
18 general move around? Aren't there different explanations  
19 for the trans -- the great movement among athletes and  
20 non-athletes?

21 DR. HARRISON: Well, I would defer to Kevin  
22 or Myles perhaps. But from what I know, I think the  
23 answer is a little bit like what Billy Martin used to say  
24 on those Miller Lite commercials: "I feel very strongly  
25 both ways."

1 I think that in some cases, they are  
2 different. You have to look at it sport by sport. In  
3 some cases and some sports, they are different. They  
4 transfer for athletic reasons, as opposed to academic.  
5 And in other sports, I think they may be more similar to  
6 what other -- what the general student body does. So I'm  
7 not -- yes in some instances; but in some instances, no.

8 DOUG LEDERMAN: Okay. Thanks.

9 MR. PETR: This is Todd. I'll just  
10 follow-up. I think that any evidence that I have will  
11 show that there's no more transfer behavior among student  
12 athletes than there is general students. And, in fact,  
13 my guess would be -- I don't have -- I haven't seen firm  
14 numbers on the total number of transfers, but I guess the  
15 behavior is more prevalent in the student body as a  
16 whole.

17 But the impetus for transfer may be  
18 different in some instances and may be the same in  
19 others. If somebody doesn't have the right degree  
20 program or something like that, anybody's going to  
21 transfer. It's something certainly that we'd like to  
22 know more about, and we'll work with the folks at the  
23 Department of Education to try to learn more about it.

24 ERIC: Thank you. Next question, please.

25 THE OPERATOR: We go back to Steve Wieberg

1 from USA Today.

2 STEVE WIEBERG: I just had a quick  
3 follow-up on the APR 925 equating to the 50 percent grad  
4 rate.

5 Kevin, if I'm not mistaken, wasn't that  
6 equating to the 50 percent federal grad rate?

7 MR. LENNON: That's correct.

8 STEVE WIEBERG: And could you tell me what  
9 it would equate to as a GSR?

10 MR. LENNON: I don't think we're able to do  
11 that yet, in part because we're still collecting the  
12 second year of APR data. I will note -- and just to pick  
13 up on something that Walt mentioned before -- I think  
14 there -- once we are comfortable that we have the GSR  
15 information available and we can provide it to the  
16 Committee of Academic Performance, I think they are  
17 interested in anchoring that APR score off of a projected  
18 Graduation Success Rate. And we just haven't been able  
19 to do that.

20 The federal rate was available. That's why  
21 the group said 50 percent on the federal rate. But I  
22 think there's a clear interest in beginning to anchor an  
23 APR score on a projected Graduation Success Rate because  
24 it's a more accurate measure, as we've talked about  
25 today.

1                   Walt, do you have anything to add to that?

2                   DR. HARRISON: No. That's correct.

3                   Someone asked earlier about what took you  
4 so long. And I think one of the reasons we used the  
5 graduation rate, the federal graduation rate, even though  
6 we knew we were going to have a more accurate GSR to tag  
7 the APR, is we wanted to get going. So we used that rate  
8 because that is what was available to us. And we assumed  
9 that when we had a more accurate measurement, we'd study  
10 it and see if we couldn't use the more accurate  
11 measurement. And that's what I think we'll do over the  
12 next year or two.

13                  ERIC: Next question, please.

14                  THE OPERATOR: We go next to Mike Murror  
15 (phonetic) with the Davis Enterprise.

16                  MIKE MURROR: Hi. I think these questions  
17 are both for Todd.

18                  When will the transitional Division I  
19 schools start to appear in this state? I think there are  
20 three that are in their third year post-moratorium. Do  
21 you know when those schools are going to start appearing  
22 in GSR data?

23                  MR. LENNON: Yes. It's likely that they'll  
24 begin to appear as -- in the year as the cohort sort of  
25 catches up. Obviously, we're six or seven years back

1 with the graduation cohort. So as the cohort catches up  
2 to their move into Division I -- so if they actually made  
3 the initial move in 2000 or '01, that's -- when we get to  
4 that cohort, that's approximately when they will move to  
5 a Division I reporting as to they could have been in  
6 Division II. And so they'll appear somewhere, but they  
7 won't get GSR until their cohort year comes to pass.

8 MIKE MURROR: And also, how is it -- how  
9 many students are sort of double-counted in this data? I  
10 know that if a student transferred between Division I  
11 institutions during this cohort, would they be counted  
12 twice?

13 MR. LENNON: It's possible that a student  
14 could be counted twice if they initially enrolled  
15 somewhere and then moved within the system. I think  
16 that's a vast minority of the transfers that we see. And  
17 because we don't have this at the individual level, I  
18 can't give you a firm number on that. But as we begin to  
19 get into -- as we develop more data, more years of data  
20 in the APR, we'll be able to track that directly. But I  
21 don't have an answer for you today.

22 MIKE MURROR: Thank you.

23 ERIC: Next question, please.

24 THE OPERATOR: We go next to Brad Wolverton  
25 with the Chronicle of Higher Education.

1 ERIC: Brad, go ahead.

2 BRAD WOLVERTON: Hi. I think with the  
3 earlier discussion about the turnover of coaches, has  
4 there been any talk about making the coaches take their  
5 old school's GSR rates with them, kind of maybe  
6 penalizing them with loss of scholarships or whatever  
7 when they move to a different college?

8 DR. HARRISON: This is Walt. I'll take a  
9 stab at this. And then Myles or Kevin might want to  
10 jump in.

11 Yes. There's been talk about it. No.  
12 We've reached -- no, we have not reached any conclusion  
13 on it. And I don't think even the talk would have to do  
14 with the penalties following them as much as simply  
15 public awareness that this is what a coach's record has  
16 been.

17 But I'd say, right now, it's only -- we've  
18 only discussed it as a possible incentive to coaches.

19 BRAD WOLVERTON: Thanks.

20 ERIC: Next question, please.

21 THE OPERATOR: We go back to Wendell  
22 Barnhouse with the Fort Worth Star-Telegram.

23 WENDELL BARNHOUSE: Yeah. This is for  
24 Kevin or Todd, I guess.

25 Just to understand the -- I know the Fed

1 rate was on a six-year window. The '95/'98 cohorts, for  
2 instance, for a certain school that I'm looking at, is  
3 that also a six-year window? In other words, is it '95  
4 to '98, that three-year period? And then does it go out  
5 to 2001/2004?

6 MR. LENNON: Yeah, that's correct. The '95  
7 group would get until the summer of 2001 to graduate and  
8 so on and so forth. Yeah, it is a six-year window like  
9 the federal rate.

10 WENDELL BARNHOUSE: Right. So this is kind  
11 of -- these GSRs, it's kind of based on a three-year  
12 snapshot, for lack of a better term. You know, in other  
13 words, you're talking about kids that came in '95, '96,  
14 and '97; correct?

15 MR. LENNON: And '98.

16 WENDELL BARNHOUSE: And '98. Right. I'm  
17 sorry. Four years, right. I got you. Okay. So you're  
18 talking about a pretty large -- you know, you're talking  
19 about a pretty large group that you've looked at here.  
20 So it's not just a one-year type, as far as the GSR is  
21 concerned. It's not just based on one class that's come  
22 in. It's basically four classes over a six-year period;  
23 correct?

24 MR. LENNON: That is true. And that's also  
25 the way the federal rate is recorded. In fact, that's

1 the law that says you have to report it that way. So we  
2 modeled it on that.

3 WENDELL BARNHOUSE: Right. But they tend  
4 to do it on a year-by-year basis. So you guys have  
5 taken -- I know that the Fed rate that you've got here  
6 mirrors that same time period, correct, as far as when  
7 you are matching up GSR with the Fed rates for each  
8 school; correct?

9 MR. LENNON: Yes. And on the January  
10 release, there'll be a most recent year released on the  
11 federal data as has been in the past.

12 WENDELL BARNHOUSE: Right. Thanks.

13 THE OPERATOR: We have no further questions  
14 in queue.

15 ERIC: Okay. Thank you again for joining  
16 us today.

17 I'd like to remind everyone that the GSR  
18 press release and the GSR data can be accessed online  
19 through the NCAA website at [NCAA.org](http://NCAA.org).

20 Thank you for joining us today.
